MUHAMMAD AMJAD

Power BI Specialist | Franchise and Retail Reporting Automation

Whatsapp: +92307-1211000 | linkedin.com/in/muhammad-amjad-powerbi | Portfolio | Github

PROFILE SUMMARY

Power BI Specialist helping franchise and retail businesses replace manual Excel reporting with automated live dashboards. 12 years of operational finance experience across 50+ locations means I understand the business problem before touching a single visual. Built reporting systems that survived format changes, system upgrades, and organizational restructuring across multi-site operations. Pipeline first. Dashboard second.

SKILLS

Power BI: DAX, Power Query (M Language), Data Modeling, Star Schema, Power BI Service, Report Builder
Data Architecture: Star Schema Design, SQL Views, Visual Studio Tabular Modeling, Fact and Dimension Tables
Databases: Microsoft SQL Server, MySQL, Google BigQuery, SQL Server Management Studio
Automation: n8n Workflow Automation, Google Apps Script, Power Query Pipelines, Scheduled Refresh, ETL
Domain: Franchise Operations, Retail Analytics, Financial Reporting, ERP Systems, Multi-location Reporting

EXPERIENCE

Power BI Specialist *Jan 2026 – Present*
Freelance | Remote

- Built automated Power Query pipeline for franchise bakery replacing daily manual CSV cleaning from a 1999 legacy POS system. Folder ingestion with dynamic parameters, automatic header and footer stripping, staging layer, and near real-time dashboard refresh with no human intervention required
- Rebuilt flat-table Power BI model into proper star schema using SQL views for business logic, Visual Studio Tabular modeling, and named DAX measures across 2 fact tables and 5 dimension tables
- Delivered retail and e-commerce analytics covering RFM customer segmentation, BCG product matrix, loyalty tier analysis, funnel optimization, and cart abandonment breakdown by device and reason

Power BI Developer *Sep 2025 – Dec 2025*
W3Skillset Freelance Agency *Power BI Training and Project Delivery*

- Built 5+ interactive Power BI dashboards across e-commerce, retail, and financial domains identifying $5M revenue recovery potential, $5.3M in return losses, and $233K cart abandonment impact
- Analyzed 40,000+ transactions and 5,000+ user sessions uncovering 58% customer inactivity, 45% cart abandonment, and 92% promotion dependency with specific reactivation and pricing recommendations
- Consolidated fragmented multi-entity Excel data into 8 integrated dashboards covering P&L, Balance Sheet, Cash Flow, and Budget vs. Actual, reducing executive reporting time from days to hours

Retail Data Analyst *Mar 2022 – Dec 2025*
Sultan Cash and Carry | Part-time

- Led complete opening inventory setup for new multi-category retail store, validating 1,500+ SKUs valued at Rs.10M, ensuring accurate master data, opening stock balances, and system readiness for launch with zero discrepancies
- Built analytics framework delivering weekly, monthly, and annual reports on sales performance, inventory turnover, and accounts health using POS systems and Excel to support stock planning and margin decisions
- Trained store staff on POS operations, inventory management, cash handling, and daily reconciliation, enabling consistent self-audits and strengthening store-level internal controls

Dawateislami Trust (NPO) | Feb 2013 – Aug 2025 | Multan, Pakistan
Progressive roles across reporting, data quality, migration, and ERP implementation over 12 years

ERP and Reporting Analyst *Jan 2021 – Aug 2025*

- Coordinated ERP financial module implementation across 13 workplaces, migrating Rs.100M in balances and 3 months of transaction history, achieving a clean go-live with fully reconciled data and zero discrepancies

- Delivered monthly and quarterly budget analysis using Excel to identify travel and utility overruns and support management cost-control decisions across multi-location operations
- Automated weekly reporting workflows using Google Apps Script and Google Forms, streamlining data collection and email distribution, saving 3 hours per week while improving reporting timeliness

Data Quality Analyst *Jan 2018 – Dec 2020*

- Managed data quality and validation for cloud-based donation platform rollout across 50+ workplaces and 2,000+ field workers, ensuring accurate digital data capture and saving 15+ hours of manual entry weekly
- Processed and validated 3 to 5 million rows of annual donation data through systematic CSV exports and multi-layer validation checks on currency, banking details, dates, and payment types
- Built daily, weekly, and monthly monitoring reports tracking un-deposited donations by field worker, enabling managers to increase recovery rates by 40% and achieve 80% paperless processing

Data Migration Analyst *Jan 2016 – Dec 2017*

- Led end-to-end digital accounting system migration for 12 workplaces, standardizing workflows, training 15 users, and reconciling 12 months of historical data across 200+ accounts with zero discrepancies pre-migration
- Reduced month-end close from 15 days to 3 days by standardizing digital workflows and achieving 80% paperless processing across locations with no accuracy loss at go-live

Reporting Analyst *Feb 2013 – Dec 2015*

- Analyzed financial performance across 12 branches with Rs.30M annual turnover, preparing monthly management reports in Excel tracking budget variances, operational trends, and cost center performance
- Conducted event-level performance analysis for 5 annual fundraising events, evaluating donation outcomes and cost metrics to support fund allocation and resource planning decisions
- Reduced reporting errors by 60% and shortened delivery timelines by 15 days through standardized Excel templates, structured validation, and branch-level budget variance reporting

PROJECTS

Franchise Bakery Reporting Pipeline Power BI, Power Query, DAX, Folder Ingestion, Star Schema | Production Project

- Replaced daily manual CSV cleaning process from 1999 legacy POS with fully automated Power Query pipeline. File drops in folder, staging layer cleans headers, footers, and inconsistent columns automatically, dashboard refreshes with no human intervention

Star Schema Data Architecture Rebuild Power BI, SQL Server, Visual Studio Tabular, DAX, SQL Views | Production Project

- Rebuilt flat-table Power BI model into proper star schema. Two source tables decomposed into 2 fact tables and 5 dimension tables. SQL views handle all business logic in the data layer. Visual Studio Tabular model deployed with named DAX measures and proper relationships

Retail BI Multi-Category Store Operations Power BI, SQL Server, Python, DAX, Power Query | Demonstration Project

- A multi-category retail store was running blind on weekly manual POS exports with no supplier price visibility and recurring stock-out losses. Built a 2-page Power BI solution on a 17-table star schema covering daily profitability, cash position, peak hour staffing, dead stock alerts, 7-day restock predictions, and supplier rate comparison across 455 products

E-Commerce Performance Analytics Power BI, DAX, Power Query, RFM Analysis, BCG Matrix | Demonstration Project

- 4-page dashboard covering RFM segmentation identifying $5M recovery opportunity, BCG product portfolio matrix, loyalty tier paradox analysis, and customer intelligence across Pakistan, UAE, and USA markets

Revenue Growth and Funnel Optimization Power BI, DAX, Funnel Analysis, Cart Abandonment | Demonstration Project

- Identified $233K cart abandonment impact across 5,000+ sessions. Mobile plus high shipping cost as top revenue leak. Hour-by-day conversion Heatmap for campaign timing decisions. Projected $8.6K annual recovery from UX improvements

EDUCATION AND CERTIFICATIONS

Bachelor of Commerce (B.Com) | Bahauddin Zakariya University, Multan *2009 – 2011*

Google Data Analytics Professional Certificate | Coursera *in Progress, Expected May 2026*

Generative AI Essentials | Maven Analytics *Completed*

Prompt Engineering Masterclass | Maven Analytics *Completed*
